BEEF UP YOUR HANDBRAKE!

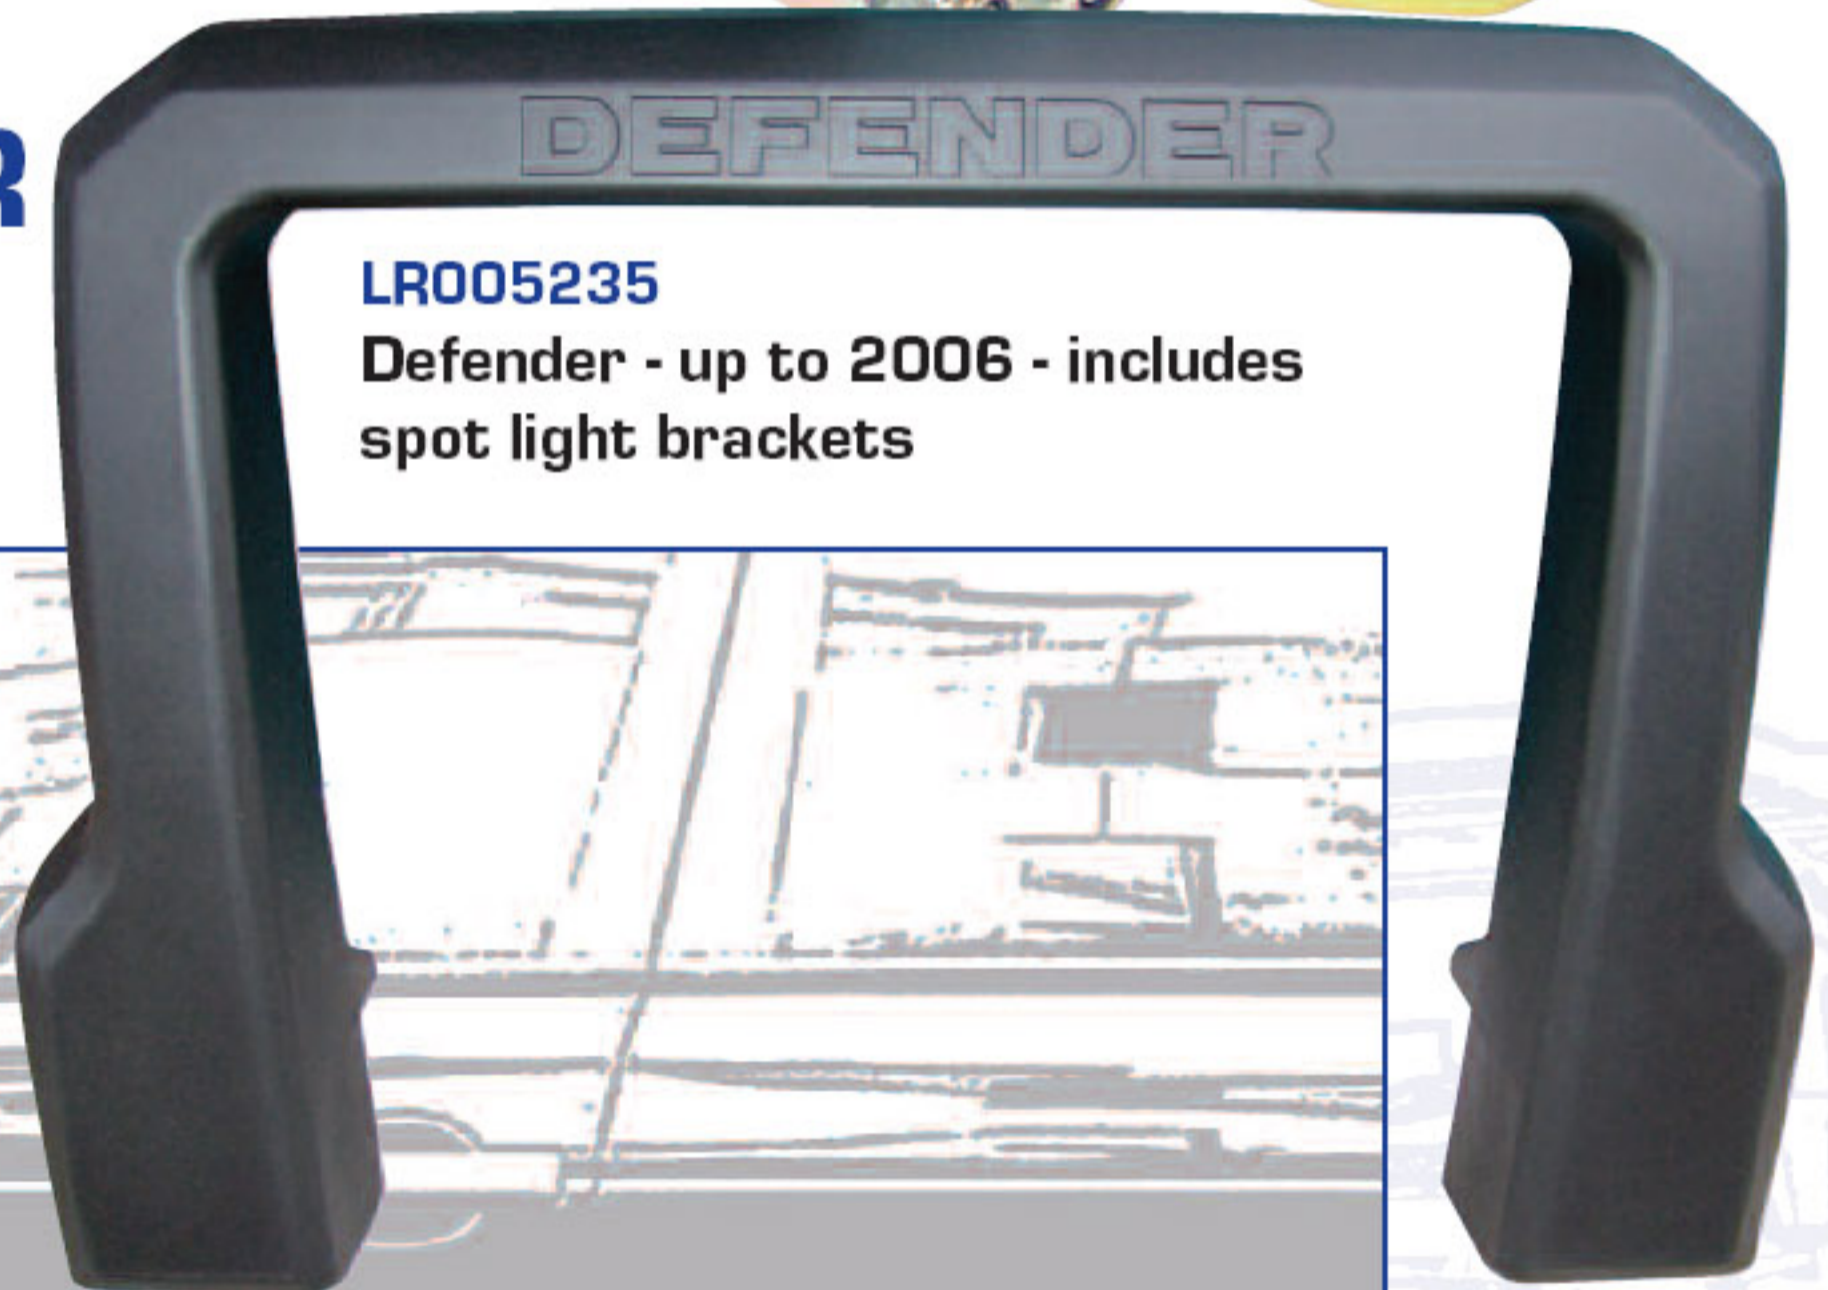

The standard Land Rover hand brake can easily get bunged up with dirt if you drive off-road a lot and once the mechanism gets clogged up it doesn't work as efficiently as it should. Britpart now offer a solution to that problem - a drum to disc conversion kit.

This kit uses a powerful caliper whose mechanism is sealed to prevent the access of mud! The special pads provide greater friction than the standard ones and are resistant from abrasion from mud.
