

Stainless Steel Side Bars

DA1074

These new polished stainless steel side bars to fit the Range Rover L322. They are identical in bar diameter (3") and style to the OEM design. Each bar has a highly polished finish to give a chrome 'mirror' effect. These side bars are made from 304 Grade Stainless Steel and will not corrode like chrome plated mild steel. Fitting is made easy as there is no drilling required - they mount on the correct points, specifically incorporated into the vehicle for mounting this accessory.

The outriggers that fit under the vehicle are welded to the bar, so each bar is one solid assembly, no additional assembly is required. The bars are supplied with all required fixings and full instructions and will fit L322 models from 2002 on, including the 2006 model and will fit all vehicles with or without mudflaps.
